THOR

THOR

Your hobby is too serious to agree for compromises. Thor combines all features of ideal boats for anglers.

Our company was created out of passion and love for fishing. We connected our experience and knowledge to create ideal fishing boats which we had always looked for, unsuccessfully, ourselves. We craft these boats according to the maxim: 'the strong thing – no compromises.' We are aware of the fact that each of us has own preferences. That is why, we get ahead our customers' expectations and we offer them the possibility of full customization of each boat.

Why is it worth to choose THOR boats?

Each boat is crafted, what guarantees the highest product quality, and also allows for full customization.

Our boats have CE certificate. It allows owners to use and register the boats in the European Union territory.

Additionally, each THOR has project category C which allows for sailing on all water bodies with the wind power up to 6B and waves with the significant height, up to 2 metres.

We wrap the outside of our boats with foil. It allows for the freedom of graphic choice and customization. Contrary to painted boats, it is much easier to change the design or eliminate possible scratches.

Why aluminum?

Aluminum is a perfect material to construct boats. It is light, durable and long-lasting. Not every aluminum is the same. In our boats we use a special alloy which is used in ship-building industry, which ensures the maximum durability and exceptional corrosion resistance in marine environment. Its unique composition makes it perfect for use in constructions exposed to mechanical tension.

Why is the construction welded?

Aluminum is an exceptionally durable material, which makes that aluminum boats are long-lasting and safe, and they require minimal maintenance.

Thanks to welding, we get 100% air-tight hull. To achieve maximum mechanical resistance, construction stitches are welded from both sides. Each THOR is welded manually and, thanks to that, we achieve exceptional quality of the workmanship.

Thor 440 RP My 2022

Standard equipment:

- Fully welded construction made of 3 mm aluminum + 6 mm boat keel
- 7 x dry locker
- Locker for fishing rods (240cm)
- Upper deck covered with loopless carpet material (material that does not get caught hooks)
- Lower deck covered by high quality marine vinyl
- Standard folding seat with height adjustment + seat socket
- Sundeck
- 2 x stainless steel bow stern eye (U-Bolts) + 1 x aluminium (front)
- 4 x stainless steel cleat
- Built-in 42l fuel tank
- External stainless steel fuel filler
- 2 x USB socket
- Bilge pump + switch
- Fuel gauge
- Top navigation light + switch
- Fuse box
- Main switch
- 2 x transom mounting plate for sonar sensors
- Boat sides (outside) wrapped with high quality foil + design
- Specially prepared tubes for easy laying of cables on the boat (e.g. for fishfinders, echomaps, sonars, trolling motors, batteries etc.)
- Displacement chambers filled with special marine foam with closed pores (which, makes boat unsinkable)

SPECIFICATION

Lenght	4,40 m
Width	1,83 m
Project category	C
Max engine	40 HP
Max persons	5 people

Additional equipment:

- Livewell (locker for live fish)
- Captain's boat seat with leg and seat socket, instead of the standard folding seat
- Casting boat seat with leg and seat socket
- Additional folding passenger boat seat with leg and seat socket
- Additional bigger folding passenger boat seat with leg and seat socket
- Additional seat socket
- Led deck light + switch
- Top navigation light + switch
- Tailor made high quality boat cover (fastened with Loxx/Tenax)
- Aluminium steps on the transom
- Covering the entire interior with a loopless carpet material
- Covering only inner parts of the side of the boat with a loopless carpet material
- Covering the bow of the boat with high quality marine vinyl
- Covering the interior of the boat lockers with a loopless carpet material or high quality marine vinyl
- Wrapping the transom with high quality foil (outside)
- Wrapping the entire interior of the boat with high quality foil
- 2 x USB socket
- 12V socket
- Optional folding stainless steel cleats
- Optional handles for opening lockers (with the option of locking with a key)
- Boat painting (boat transom + upper parts of the sides of the boat)

Thor 440 SP My 2022

Standard equipment:
